### Safety Precaution

Following messages are safety reminders on how to protect your system from damages, and thus help you lengthen the life cycle of the system.

1. Check the Line Voltage
  - The operating voltage for the power supply should cover the range of 9V~36V DC; otherwise, the system may be damaged.
2. Environmental Conditions
  - Do not lay your SP-7256 flat on the table when it is in operation. Be sure to allow enough room on each side to have easy access.
  - Avoid moving the system rapidly from a hot place to a cold place or vice versa because condensation may come from inside of the system.
  - Place SP-7256 against strong vibrations, which may cause hard disk failure.
3. Handling
  - Do not turn the system upside down. This may cause the hard drive to malfunction.

- Do not allow foreign objects to fall into this product.
  - If water or other liquid spills into this product, unplug the power cord immediately.
4. Good Care
    - When the outside of the case is stained, remove the stain with neutral washing agent with a dry cloth.
    - If dust has been accumulated on the outside, remove it by using a special made vacuum cleaner for computer.

**CAUTION!**

Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

**WARNING!**

Some internal parts of the system may have high electrical voltage. Therefore we strongly recommend qualified engineers open and disassemble the system.
